# Will You Join the War on Waste?

## Waste Less, Live Better

As part of Kids Teaching Kids Week 2017, St Joseph's Enviro Team are having an "War on Waste Art Exhibition".

All children, staff, parents and teachers are invited to enter artworks, posters, poems, projects etc.

*Every year, Australians generate millions of tonnes of waste in food, fashion, packaging and more. In the last 20 years our population has grown by 28 per cent, but the amount of waste we produce has increased 170 per cent.*

*In the 1960s, Australians were considered among the best in the world when it came to dealing with waste.*

*Many recycling programs – especially those involving paper and newspaper – were pioneered in Australia. And the launch of the Keep Australia Beautiful campaign in the late-1960s and 1970s put the issue of waste at the forefront of the national.*

*With the amount of waste increasing in Australia by nearly 8% a year, what happens if we do nothing? Is it time for us, as a nation, to seriously re-examine the ways we consume and dispose of consumer items?*

*Kids Teaching Kids aims to inspire future environmental leaders.*

*4th –8th September, 2017*

## ▶ What's on During Opening Night
